Our Mission

To promote ecologically sound management of invasive plants in western North America by facilitating collaboration and partnerships among scientists, educators, policy makers and natural resource managers.

Our Objectives

Facilitate collaboration and communication among scientists, land managers, and policymakers.

- Reinstatement of a research grants program supporting innovative approaches to ecologically-based management
- Regional research/management initiatives
- Symposia and workshops

Serve as a science-based information clearinghouse for ecological management of invasive plants in the West.

- Comprehensive web site featuring news, resources, management theory and application, searchable databases, and contacts to invasive plant specialists in the region

Provide professional development opportunities for land managers and educators.

- Online workshops and self-study modules
- Training and workshops

Serve as a resource center for Cooperative Weed Management Areas (CWMA).

- Reinstatement of a grants program for community-led CWMA
- Current list of funding opportunities for community-led CWMA
- Products and tools for land managers and CWMA
